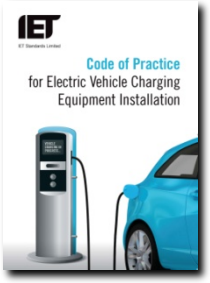
IET Standards Limited

Code of Practice
for Electric Vehicle Charging Equipment Installation

Edition, First published 2012
ISBN 978-1-84919-514-0 (paperback)
ISBN 978-1-84919-515-7 (PDF)



Errata

The list below is provided to help trainers and those who wish to update the first edition of this book:

1. Page 5, top of page, add new title:
   Mode 3 charging.

2. Page 30, 6.2.3 (ii), add text at end of paragraph:
   (ii) For outdoor connecting points, when a risk assessment shows that the electric vehicle charging equipment, connection point and vehicle on charge are not simultaneously accessible with conductive-parts connected to a PME earthing arrangement, e.g. the separation is more than 10 m, the charging circuit may be part of a TT installation.

3. Page 31, Fig 6.1, Change I_n = 30 A to I_n = 32 A:

4. Add index pages 85 and 86, as overleaf.

INDEX

A
accessibility 18
a.c. charging equipment 3–6
automatic disconnection of supply 26, 33, 41, 49

B
British Standards 83–4
  BS 7671 21, 25, 51
  BS EN 61851 21
  BS EN 62196 8, 55
built-in energy meters 9
buried cables 39–41

C
cables 26
  buried 39–41
  charging connectors 8, 55–6
  commercial and industrial installations 48
  domestic installations 33
  on-street installations 39
  trip hazards 19
car park installation 47–8
CE marking 3
certification 51
charging cables 4–5, 19, 56
charging connectors 55–6
charging equipment
  free space around 19
  location of controls and socket-outlets 18
  location of equipment 15–17
  positioning relative to parking space 15–17
  protection against vehicle impact 18
  ventilation and cooling 19
charging Modes 3–7
charging posts 6
circuit-breakers 8, 13
  see also residual current devices (RCD)
circuit design 25–6
  commercial and industrial installations 48
  domestic installations 33
  on-street installations 39
colour coding, buried cables 39–41
commercial and industrial installations
  electrical requirements 45–50, 73–4
  physical installation requirements 72
  pre-installation checks 71
communications features 9, 13, 51
competent person 11, 79
controls, location of 18

D
d.c. charging equipment 7
dedicated socket outlets 5, 8, 19
disabled access 18
distribution network operator (DNO)
  notification to 53, 57
  pre-installation checks 11, 12, 21
domestic installations
  electrical requirements 29–35, 61
  physical installation requirements 60
  pre-installation checks 59
