# THE ENIGMA MACHINE AND FRIENDS

John Alexander

**Monday, January 28, 2008 at 6:15 PM**

Main Lecture Theatre B0001 Northumbria University  
Ellison Building, Ellison Place, Newcastle upon Tyne

Almost everyone has heard of the German Enigma machine from WWII, but many other systems were attacked by Bletchley Park's Code breakers too. Enigma & Friends is a collection that brings together many of these systems and displays them side by side for comparison. The period 1935 to 1999 is represented here.

Available to view will be a selection of Hagelin pinwheel machines - C36, BC38, C52, BC52RT, the German Enigma, NEMA, Typex (parts) and Fialka - all Enigma-like machines used by the Swiss, the UK and Russia.

The speaker will cover the above systems from before and during WWII, on into the Cold War.

**Tea at 5 30 PM**

*Location information is available at:*
