

Preparing for **professional registration**

One day course

Professional registration recognises your skills and experience and demonstrates your commitment to professionalism. For those whose aim is to work towards professional registration as CEng, IEng or EngTech using UKSPEC the path to achieving this professional recognition can be daunting. This course will take you through the requirements of UKSPEC (UK Standards for Professional Engineering Competence) and the process of preparing and submitting your application.

Who will benefit from attending this course?

This course is ideal for anyone about to embark on the route to achieving professional registration

What will you learn?

As a result of attending this course you will be able to:

- Understand the competencies of UKSPEC and identify where you currently sit against the competencies
- Understand what evidence you can use to support your competency statements
- Identify how career manager can help in your route to professional registration
- How to build your own support network
- Understand tools and support available to you and how to access them
- Understand what is required when you apply for registration.

What topics are covered?

- Why register?
- Using competences for professional development
- Levels of competence
- Using career manager
- Evidence collection
- Why have a mentor
- Making the most of your support network
- Applying for Registration
- The interview process
