Impact in Society Awards

Things to note

- These awards are open for third party nomination and self-application. We encourage teams to nominate themselves.
- A lead applicant or nominator will be asked to complete the online form (not every member of a team).

Criteria

- Applications and nominations must be for teams only. The team can be of any size and anywhere in the world.

- Must have evidence of measurable societal impact in any of the following Societal Challenges measured by the IET:
  - Healthy lives – assisted living, robotics
  - Digital Futures – promoting professional ethics and trust
  - Sustainability and climate change – securing a zero-carbon future

- Must clearly demonstrate effective teamwork that has led to a societal benefit, this can include cross/multi/interdisciplinary working.

- Must be able to provide some feedback on the results achieved at the point of application.

- Applicants should strongly consider both day-to-day engineering and as well significant advancements that they may have done to improve quality of life and be able to demonstrate this clearly

- Teams must have or be providing solutions for societal benefit.

- Submissions can be accepted from teams that show impressive work in progress but is yet to receive full societal payoff.
