Bite-size mentor training – The key skills

Overview
With an increasing demand for online learning, we have created ‘bite-sized’ e-classes. We have taken the fundamental information from our full day courses and condensed it down into short, informative learning sessions.

The use of mentoring has become widespread and mentors are now regarded as one of the most important sources of professional support and advice. This bite-size session aims to explore what is meant by the term mentoring and develop the key skills required to become an effective mentor.

Who should attend?
Whether you are looking for an introductory session or even just a refresher; then our online, bite-sized learning may be an option to consider.

Topics covered
- Your role as an IET Mentor
- Differences between mentoring and coaching
- Key skills of a mentor
- The stages of a mentoring process
- Communication skills

Objectives
- Using the information provided correctly identify the 3 stages of the mentoring process by the end of the session
