- The following tips can help minimise challenges and ensure the meetings are as efficient and interactive as possible
  - **Test your connection**: To save time should you have to install the Skype Meeting App web software
  - **Choose a quiet location & use a headset**: Otherwise other participants will find it difficult to hear you.
o **Turn video on**: To enhance the level of interaction by providing visual cues, such as body language.

o **Mute when you are not speaking**: To minimise background noise and ensure everyone can be heard.

o **Always introduce yourself before speaking**: As it can be hard to identify a person just by his or her voice.

o **Address other participants by name**: This keeps the conversation flowing and everyone can be heard.

o **Speak loudly and clearly**: To ensure everyone can hear you.

o **Don’t Interrupt others**: When others are talking, always let them finish before offering a thought of your own.

o **Give the meeting your full attention**: Activities such as typing during a meeting can create a distracting noise.

o **Use a wired network**: Using a wireless network may impact the audio quality.
