The research was carried out by The Altmetrics Research Team at the Centre for HEalthy and Sustainable CitieS (CHESS), Wee Kim Wee School of Communication and Information, Nanyang Technological University (NTU), Singapore and is based on a comparison of median average downloads for publications in a control group (where authors had not explained or shared the work via Kudos) against those in the treatment group, which had used Kudos (https://blog.growkudos.com/2016/06/24/23-percent-increase/).

Ensuring that people can find, read and understand your research is key to them being able to apply the findings and potentially cite it in future. Through our partnership with Kudos, we provide the tools to help you increase the visibility, usage and impact of your work.

Get started today!

- Register an account on www.growkudos.com
- Find and claim your publications - find your publications by clicking Add Publications on the Author Dashboard page
- Explain your publication - explain what your work is about and why it is important
- Enrich your publication - add links to related resources such as images, videos and data sets to give readers a broader view of your work
- Share your work - share links to your work on social media, email, slide decks, blogs and other channels
- Measure impact - view metrics including citations, Altmetric score, full text downloads, clicks and views on Kudos to assess the impact of your work
- Watch readership increase - sharing and explaining your work increases full text downloads by 23%*
- Get your co-authors involved! Invite your co-authors to add their perspectives and share the work to further increase visibility and impact
- Share your work - share links to your work on social media, email, slide decks, blogs and other channels
