Table of contents

Measures to support accessibility

The IET wants as many people as possible to be able to use its websites. In this site you should be able to:

- change colours, contrast levels and fonts

- zoom in up to 200% without the text spilling off the screen

- navigate most of the website using just a keyboard

- navigate most of the website using speech recognition software

- listen to most of the website using a screen reader (including the most recent versions of JAWS, NVDA and VoiceOver)

We also aim to make text as easy as possible to understand, although some of our content is necessarily of a technical nature.

The IET aims to ensure accessibility of its websites by:

- including accessibility in our internal policies

- integrating accessibility into our procurement practices

- having clear accessibility goals and accountabilities

- continuously monitoring our sites for accessibility conformance

AbilityNet provides advice on making your device easier to use if you have a disability.

Technical specifications

Accessibility of IET websites relies on the following technologies to work with the web browser, and any assistive technologies or plugins, installed on your computer:

- HTML

- WAI-ARIA

- CSS

- SVG

- JavaScript

These technologies are relied upon for conformance with our stated accessibility standards.

Compatibility with browsers and assistive technology

Our sites are designed to be compatible with the following technologies:

- Current and recent versions of Chrome, Edge, Firefox and Safari browsers on Windows, MacOS, Android and iOS operating systems.

Conformance status

The Web Content Accessibility Guidelines (WCAG) defines requirements for designers and developers to improve accessibility for people with disabilities. This site is partially conformant with WCAG 2.2 level AAA. Partially conformant means that some features or content do not fully conform to the accessibility standard.

WAI-ARIA markup is used in most components.

Automated monitoring of conformance with accessibility standards, including WCAG 2.2, currently records a score of 83.8 for this site; details can be found below.

Assessment approach

The IET assesses the accessibility these sites using the following approaches:

- self-evaluation (manual audits, automated monitoring)
- external evaluation (engaging external agencies to review specific sites)

Limitations and alternatives

Despite our ongoing efforts to ensure accessibility of our sites, there are some limitations. Below is a description of known issues, and potential solutions. This list is unlikely to be exhaustive; please contact us (see details above) if you observe an accessibility issue not described here.

PDF Accessibility

The Education site exists primarily to disseminate teaching materials, with many in the PDF file format. SiteImprove has scanned over 200 PDFs and fount the following issues:

Issue	Count
The document contains no headings	134
The document has no title	160
The document is not tagged	59
The document has no bookmarks	24
The image has no alternative presentation	100
The document is missing a language definition	25
The table has no table headings	15
The form element does not have a label explicitly connected	4
The document contains untagged content	10
The heading structure is incorrect	1
The first heading is not a Heading 1	1

A file-by-file summary is available in Appendix 2, and detail is available on demand in SiteImprove.
