Do you think the NHS contact tracing app (or equivalent) will be an effective tool in containing COVID-19?

Yes

No

Maybe

Unsure

Survey (2/5)

0 8 0

When the NHS contact tracing app (or equivalent) becomes available, will you download it?

Yes

No

Maybe

Unsure

Survey (3/5)

080

What would be your main reason for installing the app? (Select all that apply)

(1/2)

It would let me know my risk of being infected

Seeing the "all clear" message would give me peace of mind

It would protect my family and friends

It would help reduce the number of deaths among older people

A sense of responsibility to the wider community

Survey (3/5)

080

What would be your main reason for installing the app? (Select all that apply)
(2/2)

It might stop the epidemic

Other

I do not plan to install the app

Survey (4/5)

079

What might concern you about downloading the app? (Please select all that apply)

(1/2)

Data Security

Privacy

Trust in its effectiveness

Trust in Government

Automation of advice to self-isolate

Survey (4/5)

079

What might concern you about downloading the app? (Please select all that apply)
(2/2)

Other

I have no concerns

Survey (5/5)

080

Which architecture would you favour in implementation of a contact tracing app?

The NHS's centralised model

The Apple/Google API decentralised model

Other

No opinion
