These ebooks and ejournals, available via the IET Virtual Library, focus on electric vehicles, covering charging, construction, design and other areas within this topic.
Hybrid Electric Vehicle System Modeling and Control (2nd Edition), Wei Liu. (2017) Expands contents on Li-ion batteries detailing the positive and negative electrodes and characteristics and other components including binder, electrolyte, separator and foils and the structure of Li-ion battery cell. Includes a new section on multi-mode electrically variable transmission.

Electric and Hybrid Vehicles - Power Sources, Models, Sustainability, Infrastructure and the Market, Gianfranco Pistoia. (2010) Information on alternative vehicular power systems, encompassing advances in the rapidly evolving battery, hybrid and fuel cell technology domains.

From Vehicles To Grid To Electric Vehicles To Green Grid: Many A Little Makes A Miracle, Fuhuo Li, Shigeru Kanemitsu and Jianjie Zhang. (2020) Provides a complete understanding of current and future issues on global warming, air pollution, natural resource depletion and smart grid cyberattacks by unifying scientific disciplines to achieve a sustainable, green society.

Wireless Power Transfer for Electric Vehicles: Foundations and Design Approach, Alicia Triviño-Cabrera, José M. González-González and José A. Aguado. (2020) Fundamentals and applications of wireless power transfer (WPT) in electric vehicles (EVs), a technology that powers devices without needing to be connected to the electrical grid by a cable.

The Fully Charged Guide to Electric Vehicles & Clean Energy. (2020) Global experts explore how sustainable technologies – from solar panels to wind turbines and electric vehicles – are getting cheaper, more effective and more available, and how by making everyday changes, we could see the ‘big switch’ in the coming decade.

Optimal Charging Control of Electric Vehicles in Smart Grids, Wanrong Tang and Ying Jun (Angela) Zhang. (2017) Introduces optimal online charging control of electric vehicles (EVs) and battery energy storage systems (BESSs) in smart grids to minimise energy costs whilst reducing the fluctuation of total power flow.

Help and contacts
If you need any assistance on using library collections and resources you can contact us via email at: libdesk@theiet.org. You can also discover more resources and support provided by the IET Library and Archives at our homepage.

IET members can access the Virtual Library via the single sign-on (SSO) service. If you are experiencing difficulties logging in via the SSO please contact the membership services team at: membership@theiet.org.

Visit theiet.org/virtual-library to view more content.
