Fellowships

A once in a lifetime opportunity at the epicentre of policy making

Applications for the British Psychological Society now open. Apply by November 30 2020. Details below.

About POST fellowships

While fellows typically get to help us with the production of a POSTnote or POSTbrief, this once in a lifetime opportunity to view the epicentre of policy-making from the inside may also include a secondment to a select committee or the House of Commons or House of Lords Libraries.

By the end of their time at POST, our fellows learn how to write for policy with balance and impartiality. They also develop a unique understanding of Westminster and forge important relationships with key stakeholders, while often delving into a novel and exciting topic of research.

All POST Fellows need to be able to work in the UK. POST Fellowships can only be confirmed after successful security vetting. [This includes a Counter Terrorist Check](#).

Everything you need to know about fellowships

Our frequently asked questions page covers all you need to know about POST fellowships. What is a fellowship? Will you need to relocate? How will you receive funding?

[Go to the FAQ page](#)

Our fellowship schemes

POST runs a number of schemes with learned societies, professional associations, and funding bodies.

The British Psychological Society Open to postgraduate psychology students. Applications for 2020-21 now closed.	SSCP and SCENARIO DTP Open to postgraduate students in their second or third year of study, registered for a PhD within the SCENARIO & SSCP DTPs. Applications for 2020-21 now open. Apply by 8 January 2021.	Nuffield Foundation Open to students doing a PhD on a scientific or quantitative social science field. Applications for 2020-21 reopen in November.
The Royal Society of Chemistry Open to RSC members doing a PhD or who have recently finished their PhD studies. Applications for 2020-21 now closed.	Wellcome Trust Open to Wellcome researchers and PhD students. Applications for 2020-21 now closed.	British Ecological Society Open to PhD students with a membership of the British Ecological Society. Applications for 2020-21 now closed.
The Institute of Food Science and Technology Open to PhD students working on a food related topic. Applications for 2020-21 now closed.	UK Research and Innovation Open to PhD students funded by one of UKRI's research councils. Applications for 2020-21 now closed.	

- Why host this event?
 - ❖ Other learned societies are more active than us;
 - ❖ More funding will be hypothecated;
 - ❖ Much public policy depends on computing;
 - ❖ Few politicians/civil servants have technical background.

Overview

- Introduction to Parliamentary committees.
- Review of what we have done.
- Case study exercise:
Lords Committee on Risk Assessment and Risk Planning
- Summary and feedback.
- Next steps...

Intended “Take-Aways”

By the end of the session:

1. Increase chance of responses being accepted by Parliamentary committees;
2. Identify ways to highlight your research, consistent with objective 1;
3. Understand wider importance of consultations for UK CS.

Introduction to Parliamentary (and other) Committees

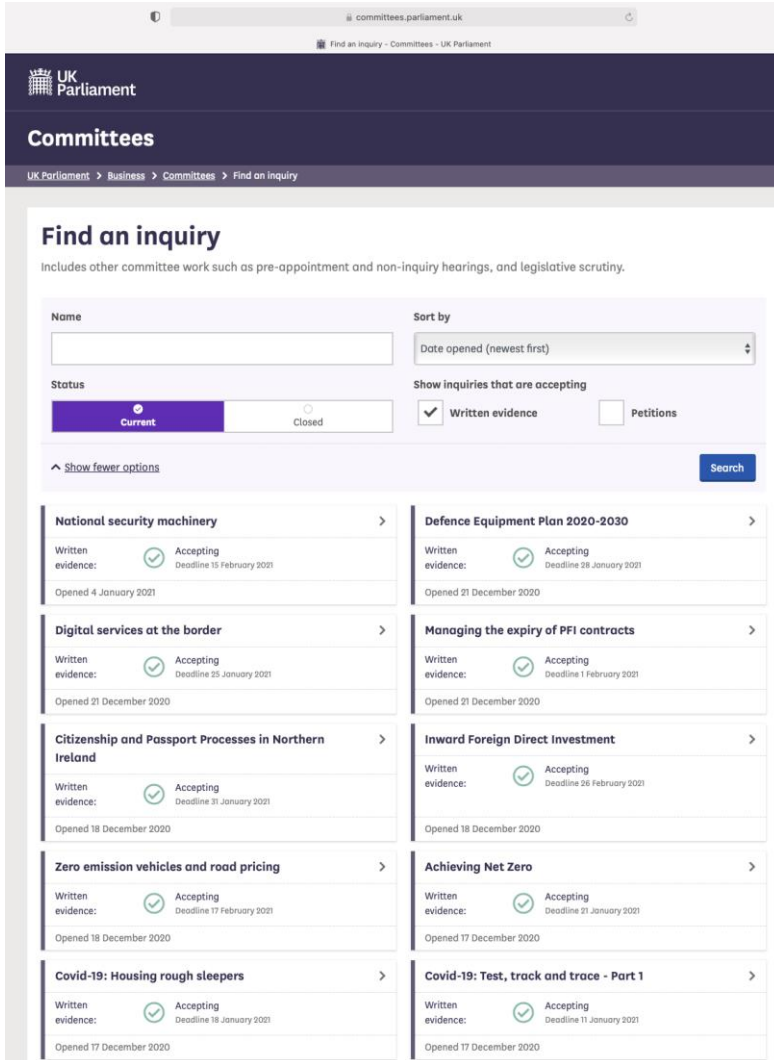

The screenshot shows the GOV.UK website interface. At the top, there's a navigation bar with the GOV.UK logo and a search bar. Below this, a banner for 'Coronavirus (COVID-19)' and 'Brexite' is visible. The main section is titled 'Policy papers and consultations'. On the left, there's a sidebar with filters for 'Topic' and 'Organisation'. The main content area shows '85 results' and a list of consultations. The first result is 'Making Tax Digital for Corporation Tax' with a brief description and a link to the consultation document. The second result is 'Generic design assessment of General Nuclear System Limited's UK HPR1000 reactor' with a brief description and a link to the consultation document. The third result is 'Draft legislation: zero-rate secondary Class 1 contributions for veterans' with a brief description and a link to the consultation document.

“There may be a number of reasons to consult: to garner views and preferences, to understand possible unintended consequences of a policy or to get views on implementation.

Increasing the level of transparency and increasing engagement with interested parties improves the quality of policy making ... and identifies unintended effects and practical problems”.

Introduction to Parliamentary (and other) Committees

The screenshot shows the 'Committees' page on the UK Parliament website. The header includes the UK Parliament logo and the title 'Committees'. Below this is a breadcrumb trail: 'UK Parliament > Business > Committees > Find an inquiry'. The main section is titled 'Find an inquiry' with a subtext: 'Includes other committee work such as pre-appointment and non-inquiry hearings, and legislative scrutiny.' The search interface includes a 'Name' search box, a 'Sort by' dropdown menu set to 'Date opened (newest first)', a 'Status' filter with 'Current' selected, and checkboxes for 'Written evidence' (checked) and 'Petitions' (unchecked). A 'Search' button is located at the bottom right of the filter section. Below the filters, a list of inquiries is displayed in two columns. Each inquiry card shows the title, a 'Written evidence' status with a green checkmark and 'Accepting' label, a deadline, and the date it was opened.

Name	Status	Written evidence	Deadline	Opened
National security machinery	Current	Accepting	Deadline 15 February 2021	Opened 4 January 2021
Defence Equipment Plan 2020-2030	Current	Accepting	Deadline 28 January 2021	Opened 21 December 2020
Digital services at the border	Current	Accepting	Deadline 25 January 2021	Opened 21 December 2020
Managing the expiry of PFI contracts	Current	Accepting	Deadline 1 February 2021	Opened 21 December 2020
Citizenship and Passport Processes in Northern Ireland	Current	Accepting	Deadline 31 January 2021	Opened 18 December 2020
Inward Foreign Direct Investment	Current	Accepting	Deadline 26 February 2021	Opened 18 December 2020
Zero emission vehicles and road pricing	Current	Accepting	Deadline 17 February 2021	Opened 18 December 2020
Achieving Net Zero	Current	Accepting	Deadline 21 January 2021	Opened 17 December 2020
Covid-19: Housing rough sleepers	Current	Accepting	Deadline 18 January 2021	Opened 17 December 2020
Covid-19: Test, track and trace - Part 1	Current	Accepting	Deadline 11 January 2021	Opened 17 December 2020

“(Parliamentary) committees consider policy issues, scrutinise government work, expenditure, and examine proposals for primary and secondary legislation.”

Aim of the inquiry

The House of Lords Select Committee on Risk Assessment and Risk Planning was appointed on 15 October 2020 to: “consider risk assessment and risk planning in the context of disruptive national hazards”. It has to report by the **end of November 2021**.

A central question for this Committee is how to ensure that the UK is as resilient to extreme risks and emergencies as possible.

In this paper, ‘hazard’ refers to a civil emergency without malicious intent, and ‘threat’ refers to those that arise from malicious intent. ‘Risk’ is used to describe the probability and consequence of classes of hazard or threat classes.

Background

The UK is at risk from a variety of events which could cause significant human, economic, environmental and infrastructure damage. The coronavirus pandemic has led to renewed focus on risk planning and preparedness, and the importance of international co-operation. This inquiry provides a key opportunity to scrutinise how well we assess, categorise and plan for extreme risks, and how to ensure the country and the systems we rely on are as resilient as possible.

Lord Arbuthnot of Edrom, Chair of the Committee said:

“Covid-19 has been a wake-up call and a reminder that events on a mega scale can happen with minimal warning. We cannot be complacent and need to do all we can to prevent these threats and enhance our resilience if the worst happens.”

The UK was one of the first countries in the world to institute a National Risk Assessment in 2005 and is widely recognised as a policy leader in this area. It remains one of the few countries in the world with a strong and deeply embedded civil contingencies secretariat and well-rehearsed disaster prevention and management protocols and procedures.

However, several limitations have been identified with the Government’s approach, principally associated with identifying risk owners, balancing scientific advice and political decision making, dealing with unknown, longer-term or emerging risks, and how decisions are made about investment in preventing future emergencies. The Committee hopes to hear from as many individuals and organisations as possible with an interest, experience or expertise in this area of policy and practice.

**QUEEN'S
UNIVERSITY
BELFAST**

Case Study

The target date for submissions is 28 January 2021.

1. What are the most significant extreme risks that the UK faces? Are these kinds of risks discrete, linked or systemic? What do you understand the term 'extreme risk' to mean?
2. Are there types of risks to which the UK is particularly vulnerable or for which it is poorly prepared? What are the reasons for this?
3. How could the Government's approach to risk assessment be strengthened to ensure that it is rigorous, wide-ranging and consistent? Your answer could refer to any aspect of the risk assessment process including, for example, its governance, the evidence base, or the degree to which it is open to scrutiny and the input of experts.
4. Given the range of possible national risks, and the need to achieve a balance between efficiency and resilience, what level of assurance should the Government be seeking on the UK's resilience to hazards? What would effective national risk management achieve, and how could its success be measured?[1]
5. How can the Government ensure that it identifies and considers as wide a range of risks as possible? What risks does the inclusion criteria for the National Security Risk Assessment exclude and what effect does this have on long-term resilience?
6. How effectively do current ways of characterising risks (for example, the use of a five-point scoring system of a 'reasonable worst case scenario') support evidence-based policy decisions? What other information would be useful?

Case Study

ANNEX: GUIDANCE FOR SUBMISSIONS

Submissions should be made through the form online
at: <https://committees.parliament.uk/submission/#/evidence/339/preamble>

If you do not have access to a computer, you may submit a paper copy to:

Clerk to the Select Committee on Risk Assessment and Risk Planning, Committee Office, House of Lords, London SW1A 0PW.

The Committee invites interested individuals and organisations to submit written evidence by 28 January 2020.

Short, concise submissions are preferred. Submissions longer than 6 pages should include a one-page summary. Paragraphs should be numbered. Please ensure the submission is free of logos and signatures.

Submissions should be dated, with a note of the author's name, and of whether the author is acting in an individual or corporate capacity. Submissions with a university or college address should make clear whether they are submitted in an individual capacity or on behalf of the university or college. All submissions made through the written submission form will be acknowledged automatically by email.

Submissions become the property of the Committee which will decide whether to accept them as evidence. Evidence may be published by the Committee at any stage. It will normally appear on the Committee's website and will be deposited in the Parliamentary Archives. Once you have received acknowledgement that your submission has been accepted as evidence, you may publicise or publish it yourself, but in doing so you must indicate that it was prepared for the Committee. If you publish your evidence separately, you should be aware that you will be legally responsible for its content.

In certain circumstances the Committee may be prepared to accept submissions but not to publish them, in whole or in part. If you would like to submit evidence on this basis you should first discuss this with the Clerk to the Committee.

You should be careful not to comment on individual cases currently before a court of law or matters in respect of which court proceedings are imminent. If you anticipate such issues arising, you should discuss with the Clerk to the Committee how this might affect your submission.

Case Study: General Questions for Discussion

1. Who is the intended audience for your response?
2. What do you need to know before answering these questions?
3. What benefits are there for (i) yourself (ii) UK Computing Science from engaging?

Case Study: Specific Responses for Discussion

Question 2: Are there types of risks to which the UK is particularly vulnerable or for which it is poorly prepared? What are the reasons for this?

Question 8: How well are national contingency plans communicated to and understood by those at a local level, including emergency responders? What could be changed to increase the capability of local responders to effectively plan for and respond to emergencies?

Question 10: What challenges are there in developing resilience capability? Your answer could refer to critical infrastructure, but also to systems and networks beyond those elements. What is the role of exercising to test risk preparedness, and are these methods utilised effectively in risk assessment and risk planning in this country?

Summary and Feedback
