

Podcast

The Evidence Space

Proving the value of technology for health, care and life sciences.

This podcast series features industry leaders from across the healthcare and life sciences sectors sharing their knowledge with engineers and the wider public.

As digital health technologies and engineering develop at an increasing pace, it is necessary to adapt to the new changes and challenges that will have a major impact on our lives.

The Evidence Space is an opportunity for innovators, as well as anyone with a general interest in technology, to gain a practical understanding of the hot topics being debated and to learn what validation evidence is expected by patients, clinicians and payers to separate 'hype' from 'help'.

Hosted by **Dr Peter Bannister CEng FIET**

@PRBannister and @theIET

Peter has helped build multiple high-growth biomedical businesses from start-up to global organisations. He is Vice President Life Sciences at Ada Health and Chairman of the IET Healthcare Sector.

Academy of Medical Sciences Future Leader in Innovation, Enterprise and Research, and Honorary Professor, University of Birmingham Institute of Applied Health Research with contributions to:

Applications

- Breast cancer screening
- Clinical trials for pharmaceuticals
- Radiation oncology
- Neuroimaging
- Surgery

Commercialisation

- R&D (multiple patents)
- Regulatory
- Manufacturing and supply chain
- Revenue and customer success

Innovation

- Deputy Chair of NIHR/ NHSX AI Award Panel
- HDRUK/ Turing/ Wellcome PhD in Health Data Science Leadership Programme Chair
- Software
- Machine learning and AI
- 3D imaging
- High voltage systems
- Radar
