1 Introduction 1
References 4

2 Digital video 5
2.1 Introduction 5
2.2 Analogue television 5
2.3 Interlace 7
2.4 Picture sizes 14
2.4.1 Standard definition television formats (SDTV) 14
2.4.2 Standard input format (SIF) 14
2.4.3 Common intermediate format (CIF) 15
2.4.4 Quarter common intermediate format (QCIF) 15
2.4.5 Video graphics array (VGA) 15
2.4.6 Quarter video graphics array (QVGA) 15
2.4.7 High definition television 16
2.5 Chrominance formats 16
2.6 Bit depth and uncompressed video bit rates 19
2.7 Concluding remarks 19
2.8 Summary 20
References 20

3 Picture quality assessment 21
3.1 Introduction 21
3.2 Subjective viewing tests 21
3.3 Analogue video quality measurements 23
3.3.1 Linear distortions 23
3.3.2 Non-linear distortions 23
3.3.3 Noise 23
3.3.4 Measurement 24
3.4 Digital video quality 24
3.4.1 Peak signal-to-noise ratio (PSNR) 24
3.4.2 Objective perceptual video quality measurement techniques 27

3.4.3 Picture quality monitoring using watermark signals 28
3.4.4 Testing picture quality analysers 29
3.4.5 Video quality measurements inside encoders or decoders 30
3.4.5.1 Double-ended video quality measurements in encoders 30
3.4.5.2 Single-ended video quality measurements on compressed bit streams 30
3.5 Concluding remarks 30
3.6 Summary 31
References 31

4 Compression principles 33
4.1 Introduction 33
4.2 Basic audio compression techniques 33
4.2.1 Frequency response 33
4.2.2 Frequency masking 34
4.2.3 Temporal masking 35
4.2.4 Transformation and quantisation 35
4.3 Introduction to video compression 37
4.4 Redundancy in video signals 37
4.5 Exploiting spatial redundancy 38
4.5.1 Example transformation and quantisation 39
4.6 Exploiting statistical redundancy 41
4.7 Exploiting temporal redundancy 43
4.8 Motion estimation 44
4.8.1 Example transformation of a predicted block 44
4.9 Block diagrams 46
4.10 Quantisation control 46
4.11 Bi-directional prediction 48
4.12 Mode decision 49
4.13 Rate control 50
4.14 Concluding remarks 51
4.15 Summary 51
References 51

5 MPEG video compression standards 53
5.1 Introduction 53
5.2 MPEG-1 53
5.3 MPEG-2 55
5.3.1 Interlace coding tools 56
5.3.2 Film coding tools 57
5.3.3 Low-delay mode 58
5.3.4 Profiles and levels 59
5.3.5 Block diagram 60
5.4 MPEG-4 61
5.4.1 MPEG-4 Part 2 (Visual) 62
5.4.1.1 Motion prediction 63
5.4.1.2 Intra-prediction 64
5.4.1.3 Object coding 64

5.4.2 MPEG-4 Part 10 (AVC) 64
5.4.2.1 New transforms 65
5.4.2.2 Entropy coding 66
5.4.2.3 Intra-predictions 66
5.4.2.4 Motion prediction 67
5.4.2.5 In-loop filter 69
5.4.2.6 Rate-distortion optimisation (RDO) 71
5.4.2.7 Block diagram 71
5.5 Structure of MPEG bit streams 72
5.5.1 Elementary streams 72
5.5.1.1 Sequence 72
5.5.1.2 Group of pictures 72
5.5.1.3 Picture 74
5.5.1.4 Slice 74
5.5.1.5 Macroblock 75
5.5.1.6 Block 75
5.5.1.7 Differences in MPEG-4 (AVC) 75
5.5.2 Transport stream 76
5.5.2.1 Timing synchronisation 77
5.5.2.2 Adaptation fields 77
5.5.2.3 Program-specific information (PSI) 79
5.6 Current MPEG activities 79
5.7 Concluding remarks 80
5.8 Summary 80
Exercise 5.1 Encoder evaluation 81
Exercise 5.2 Bit-rate saving 81
Exercise 5.3 PSNR limit 81
References 82

6 Non-MPEG compression algorithms 85
6.1 Introduction 85
6.2 VC-1 SMPTE 421M 85
6.2.1 Adaptive block-size transform 86
6.2.2 Motion compensation 86
6.2.3 Advanced entropy coding 87
6.2.4 De-blocking filter 87
6.2.5 Advanced B frame coding 87
6.2.6 Low-rate tools 87
6.2.7 Fading compensation 87
6.3 Audio Video Coding Standard (AVS) 87
6.3.1 Transform 88
6.3.2 Intra-predictions 88
6.3.3 Motion compensation 88
6.3.4 Entropy coding 88
6.3.5 De-blocking filter 88
6.3.6 B frame coding modes 88
6.4 Wavelet compression 91
6.5 JPEG2000 92
6.6 Dirac 94
6.6.1 Dirac Pro 95
6.7 Concluding remarks 95

6.8 Summary 96
Exercise 6.1 Clip encoding 96
Exercise 6.2 Codec comparison 96
References 96

7 Motion estimation 99
7.1 Introduction 99
7.2 Block-matching algorithms in the spatial domain 100
7.2.1 Exhaustive motion estimation 100
7.2.2 Hierarchical motion estimation 104
7.2.3 Other block-matching methods 107
7.2.3.1 Spiral search 107
7.2.3.2 Sub-sampling method 108
7.2.3.3 Telescopic search 108
7.2.3.4 Three-step search 109
7.3 Correlation algorithms in the frequency domain 109
7.3.1 Phase correlation 110
7.3.2 Cross-correlation 111
7.4 Sub-block motion estimation 112
7.5 Sub-pixel motion refinement 113
7.6 Concluding remarks 113
7.7 Summary 114
Exercise 7.1 Motion estimation search range 114
References 114

8 Pre-processing 117
8.1 Introduction 117
8.2 Picture re-sizing 117
8.2.1 Horizontal down-sampling 117
8.2.2 Vertical down-sampling in SDTV systems 119
8.2.2.1 Temporal sub-sampling 120
8.2.2.2 Intra-field down-sampling 120
8.2.2.3 Vertical-temporal down-sampling 120
8.3 De-interlacing 120
8.3.1 Motion-adaptive de-interlacing 121
8.3.2 Motion-compensated de-interlacing 121
8.3.3 De-interlacing and compression 122
8.4 Noise reduction 122
8.4.1 Introduction 122
8.4.2 Types of noise 123
8.4.3 Bit-rate demand of noisy video signals 123
8.4.4 Noise reduction algorithms 124
8.4.4.1 Temporal noise reduction algorithms 125
8.4.4.2 Spatial noise reduction algorithms 126
8.4.4.3 Noise-level measurement 126
8.4.4.4 Impulse noise reduction 127
8.4.5 De-blocking and mosquito filters 127
8.4.5.1 De-blocking filters 127
8.4.5.2 Mosquito noise filters 128

8.5 Forward analysis 129
8.5.1 Introduction 129
8.5.2 Film mode detection 129
8.5.3 Scene cuts, fades and camera flashes 129
8.5.4 Picture criticality measurement 130
8.5.5 Global coding mode decisions 130
8.5.6 Detection of previously coded picture types 130
8.6 Concluding remarks 130
8.7 Summary 131
Exercise 8.1 De-interlacing 131
Exercise 8.2 Vertical down-sampling 131
Exercise 8.3 HD to SD conversion 131
Exercise 8.4 Encoder optimisation 132
References 132

9 High definition television (HDTV) 135
9.1 Introduction 135
9.2 Compression of HDTV 136
9.3 Spatial scalability 136
9.4 Progressive versus interlaced 138
9.5 Compression of 1080p50/60 140
9.6 Bit-rate requirement of 1080p50 140
9.6.1 Test sequences 140
9.6.2 Test configuration 141
9.6.3 Bit-rate results 142
9.6.4 Qualification of these results 143
9.7 Concluding remarks 144
9.8 Summary 145
Exercise 9.1 HDTV contribution 145
References 146

10 Compression for mobile devices 149
10.1 Introduction 149
10.2 Compression algorithms for mobile applications 149
10.3 Pre-processing for TV to mobile 150
10.4 Compression tools for TV to mobile 151
10.4.1 CABAC 152
10.4.2 B frames 152
10.4.3 Main Profile 152
10.4.4 Decode time 153
10.5 Scalable video coding (SVC) 154
10.6 Transmission of text to mobile devices 155
10.7 Concluding remarks 156
10.8 Summary 157
Exercise 10.1 Compression for mobile devices 157
References 157

11 MPEG decoders and post-processing **159**
11.1 Introduction 159
11.2 Decoding process 159
11.3 Channel change time 161
11.4 Bit errors and error concealment 162
11.5 Post-processing 164
11.6 Concluding remarks 165
11.7 Summary 166
Exercise 11.1 Channel change time 166
Exercise 11.2 Filter design 166
References 166

12 Statistical multiplexing **169**
12.1 Introduction 169
12.2 Analysis of statistical multiplex systems 171
12.3 Bit-rate saving with statistical multiplexing 173
12.4 Statistical multiplexing of MPEG-4 (AVC) bit streams 174
12.4.1 Comparison of bit-rate demand of MPEG-2 and MPEG-4 (AVC) 175
12.4.2 Bit-rate demand of MPEG-4 (AVC) HDTV 177
12.5 System considerations 178
12.5.1 Configuration parameters 178
12.5.2 Noise reduction 179
12.5.3 Two-pass encoding 180
12.5.4 Opportunistic data 180
12.6 Concluding remarks 181
12.7 Summary 181
Exercise 12.1 Statistical multiplexing at median bit-rate demand 182
Exercise 12.2 Large statistical multiplex system 182
References 182

13 Compression for contribution and distribution **183**
13.1 Introduction 183
13.2 MPEG-2 4:2:2 Profile 184
13.2.1 Bit-rate requirement of 4:2:2 Profile 184
13.2.2 Optimum GOP structure with high-bit-rate 4:2:2 encoding 184
13.2.3 VBI handling in MPEG-2 4:2:2 encoding 185
13.3 MPEG-4 (AVC) 188
13.3.1 CABAC at high bit rates 190
13.3.2 MPEG-4 (AVC) profiles 190
13.3.3 Fidelity range extension 191
13.3.4 4:2:2 MPEG-4 (AVC) 192
13.3.5 Comparison of 8 and 10 bit coding 194
13.3.6 Low-delay MPEG-4 (AVC) 196

13.4 Concluding remarks 196
13.5 Summary 197
Exercise 13.1 Distribution link 197
References 197

14 Concatenation and transcoding 199
14.1 Introduction 199
14.2 Concatenation model 200
14.3 Detection of MPEG frame types in decoded video signals 203
14.4 Bit-rate saving 204
14.5 MPEG-2/MPEG-4 (AVC) concatenation 205
14.6 Fixed bit rate into variable bit rate 206
14.6.1 MPEG-2 to MPEG-2 concatenation 206
14.6.2 MPEG-2 to MPEG-4 (AVC) concatenation 208
14.6.3 MPEG-4 (AVC) to MPEG-4 (AVC) concatenation 210
14.6.4 Concatenation of HDTV 211
14.6.5 MPEG-4 (AVC) to MPEG-2 concatenation 212
14.7 Variable bit rate into fixed bit rate 212
14.7.1 MPEG-2 downstream encoder 213
14.7.2 MPEG-4 (AVC) downstream encoder 213
14.8 Concluding remarks 214
14.9 Summary 215
Exercise 14.1 Concatenation with statistical multiplexing 215
Exercise 14.2 Concatenation of DTH signals into MPEG-4 (AVC) encoder 215
Exercise 14.3 Concatenation of DTH signals into MPEG-2 encoder 215
Exercise 14.4 Concatenation of 4:2:0 signals 216
References 216

15 Bit-stream processing 217
15.1 Introduction 217
15.2 Bit-rate changers 217
15.3 Transcoding 219
15.4 Splicing 219
15.4.1 Splicing and statistical multiplexing 221
15.4.2 Insertion of pre-compressed video clips 222
15.5 Concluding remarks 223
15.6 Summary 223
Exercise 15.1 Bit-stream processing 223
Exercise 15.2 Splicing between different bit rates 224
References 224

16 Concluding remarks 225
References 226

Appendix A: Test sequences referred to in this book **227**
A.1 SDTV test sequences 227
A.2 HDTV test sequences 228

Appendix B: RGB/YUV conversion **229**
B.1 SDTV conversion from RGB to YUV 229
B.2 SDTV conversion from YUV to RGB 229
B.3 HDTV conversion from RGB to YUV 229
B.4 HDTV conversion from YUV to RGB 230

Appendix C: Definition of PSNR **231**

Appendix D: Discrete cosine transform (DCT) and inverse DCT **232**

Appendix E: Introduction to wavelet theory **233**
E.1 Introduction 233
E.2 Relationship to windowed Fourier transformation 233
E.2.1 Orthonormal wavelets 234
E.2.2 Wavelets based on splines 235
References 236

Appendix F: Comparison between phase correlation and cross-correlation **237**

Appendix G: Polyphase filter design **239**
G.1 Down-sampling by N 239
G.1.1 Numerical example 239
G.2 Up-sampling by M 240
G.2.1 Numerical example 240
G.3 Up-sampling by M/N 240
G.3.1 Numerical example 241
G.4 Down-sampling by M/N 241
G.4.1 Numerical example 241

Appendix H: Expected error propagation time **243**

Appendix I: Derivation of the bit-rate demand model **245**

Bibliography **247**
Useful websites 249

Glossary **251**

Example answers to exercises **257**

Index **263**
